Date of Birth: 01/15/1980 (Age 46)	Gender: Male
Referred For: DBS Clinical Clearance (CPT 61863)	Prior Auth Case: PA-2026-00001
Evaluating Physician: Dr. Sarah Jenkins, MD	NPI: 1780923410

NEUROPSYCHIATRIC EVALUATION & COVERAGE CRITERIA VERIFICATION

Clinical Condition & Treatment History:

Patient evaluated for Deep Brain Stimulation (CPT 61863). Primary diagnosis: **Essential tremor** (ICD-10 G25.0). Patient has **failed maximal medical therapy for controlling tremor** following a 14-month trial of Propranolol and Primidone. Clinical notes duration: **14 months** of documented specialist care.

Psychometric & Cognitive Findings:

- **Mini-Mental State Examination (MMSE):** Score = **29 / 30** (Cognitively intact; cutoff ≥ 24).
- **Severe Depression:** No evidence (Hamilton Depression Rating Scale Score = 5, normal euthymic range; no evidence of severe depression).
- **Beck Depression Inventory (BDI-II):** Score = **6** (Minimal).

Safety & Contraindications Screening:

Comprehensive psychiatric and neurological evaluation confirms:

- **Psychiatric Exclusion Check:** None identified. Patient is fully cleared of all psychiatric contraindications.
 - **Neurological Exclusion Check:** None identified. Patient is fully cleared of all neurological contraindications.
- Patient meets all safety criteria for Deep Brain Stimulation lead placement.

Final Recommendation:

Patient meets all policy coverage guidelines under Deep Brain Stimulation Policy. Full approval recommended.
