CLINICAL INDICATION & CLINICAL NOTES (FOR AUTO-FILL / REVIEW)

Patient History & Clinical Indication: 73-year-old male (Age 73 years old) presenting with severe Essential Tremor (ICD-10 G25.0) requesting unlisted procedure code CPT 61899 (mismatched / wrong CPT code for DBS thalamic lead implantation). Patient trialed Propranolol & Primidone over 14 months of clinical management (clinical notes duration: 14 months). MMSE Score: 28 / 30. Clinical evaluation confirms presence of policy exclusions: patient is diagnosed with refractory obsessive-compulsive disorder (F42.2 - Refractory Obsessive-Compulsive Disorder policy exclusion), primary headache disorder (G44.0 - Primary Headache policy exclusion), and neuropathic pain syndrome. Triggers Nurse Review Required due to wrong CPT code 61899 and policy exclusions (Refractory Obsessive-Compulsive Disorder, Primary Headache, Neuropathic Pain).
